

TESEO®

SINCE 1988

TESEO 20 year warranty – longest in the pipework sector

The Teseo modular aluminium pipework system for the delivery transfer of compressed air, inert gases, fluids and vacuum, is now covered by a 20-year warranty – the longest product assurance available in the manufacturing pipework business sector.

The Teseo 20-year warranty covers defects in the materials of aluminium pipes and fittings in its modular pipework systems.

“As the world’s first manufacturer of modular aluminium systems, we decided to reaffirm our leadership by extending the warranty period for defective parts to 20 years”, says Teseo founder Gianfranco Guzzoni. “Our 20 year warranty is more than twice as long as our competitors and clear evidence of the quality and reliability of our systems and we are the only manufacturer who can prove this as our initial installations date back to the early nineties.”

Teseo has been at the forefront of modular aluminium pipework systems since 1988 with thousands of installations performing effectively over a 20 year period.

The Teseo modular aluminium pipework system for the delivery transfer of compressed air, inert gases, fluids and vacuums, features

smooth bore, lightweight aluminium extrusions for increased flow and lower pressure drop. A comprehensive range of connectors and adaptors makes the Teseo system the most versatile for fast and efficient installation and subsequent alterations without major down-time. System assembly does not require any threading, welding or painting and the four flat surfaces of the pipework enables easy and safe fixing. Perfect Dual O-ring sealing eliminates air leaks reducing wasteful energy costs.

“Our 20-year warranty is more than twice as long as our competitors and clear evidence of the quality and reliability of our systems and we are the only manufacturer who can prove this as our initial installations date back to the early nineties.”

Gianfranco Guzzoni, Teseo founder
